

# FS Maestro – Fan Soaker Control Software

Take control of your cow cooling needs

Agpro's FS Maestro program is designed specifically for Dairy Cow Cooling. Daily records of temperature, humidity and THI are kept. Cooling parameters are available and easily adjusted. A simulation of how changes to cooling parameters affect power and water usage is provided allowing 'what if' analysis from your office. Reports and alarms are given concerning the status of your system.

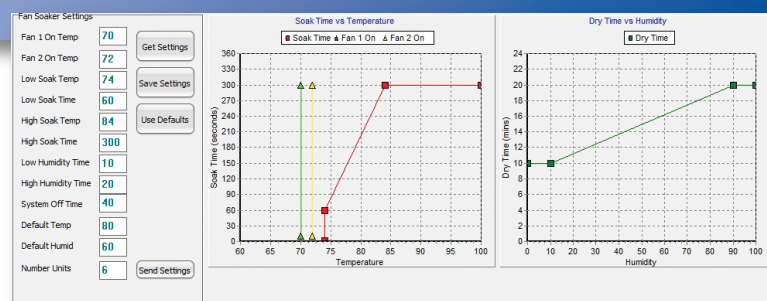

## Record:

- Temperature
- Humidity
- Temperature/Humidity index

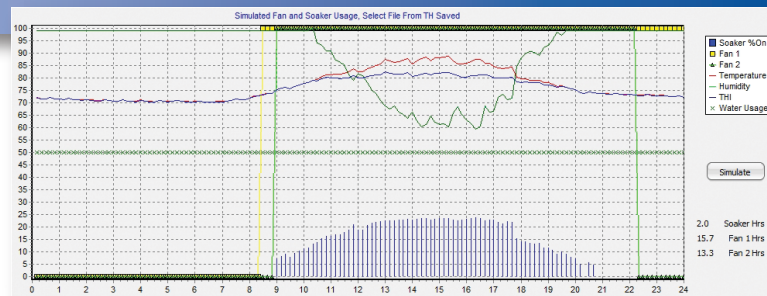

## Control:

- Fan usage
- Water usage
- Based upon temperature and humidity

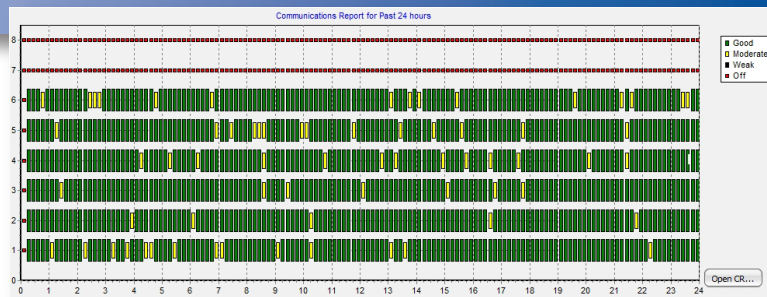

## Simulate:

- Fan usage
- Water usage
- Using recorded temperature/humidity profiles

## Monitor:

- Status of remote fan/soaker controllers
- Current temperature and humidity

Agpro

# Complete COW COOLING Solution

## Cool

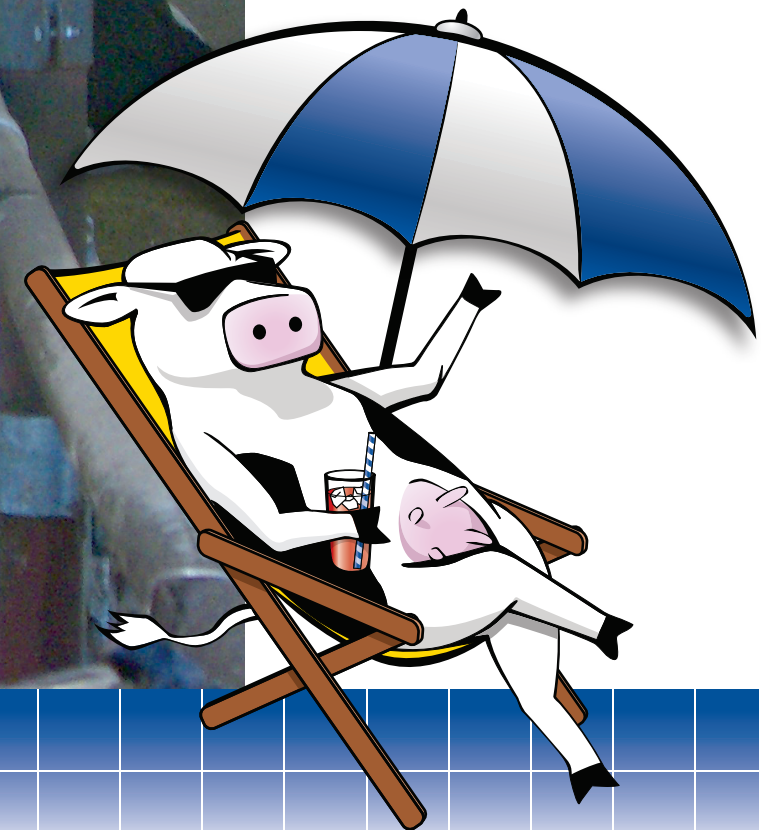

- Reduce heat stress for your dairy herd
- Increase milk production

## Conserve

- Use water and power wisely
- Reduce utility costs

## Correct

- Monitor system performance
- Identify problems quickly
